

GIGHAMMER

GIGHAMMER FOUNDING PARTNER BRIEFING

THE CHALLENGE

National Governing Bodies (NGBs) currently face a "Governance Gap." While central databases (CRMs) track member names, they fail to verify member **actions**. This creates a significant liability blind spot regarding safeguarding, insurance, and policy adoption.

THE SOLUTION

Gighammer is a "System of Action" designed to sit alongside your existing CRM. It provides a direct, auditable link to group leaders, ensuring that national directives are received, understood, and implemented in real-time.

KEY FEATURES & BENEFITS

Master-Push Deployment: Update a safeguarding policy or insurance requirement once. Our system "pushes" the directive into the digital vaults of every member group instantly. No more lost emails or ignored attachments.

The Compliance Dashboard: Stop relying on spreadsheets. Our Dashboard provides a "Traffic Light" overview (Red/Amber/Green) of your entire network.

- **Identify Risk:** Spot regional gaps or high-risk groups before they become a liability.
- **Surgical Communication:** Send automated "nags" only to the groups that are non-compliant, protecting your members from notification fatigue.

Direct Auditable Link: Gighammer creates an immutable bridge to group leaders. We don't just track delivery; we forensically log the entire engagement lifecycle—from **Received** to **Viewed** to **Digitally Signed**.

STRATEGIC SAFEGUARDING:

THE "SAFE-TO-WORK" FRAMEWORK

MOVING FROM REACTIVE SPREADSHEETS TO PROACTIVE, AUTOMATED PROTECTION.

Gighammer introduces a sophisticated, three-tier safeguarding architecture designed to eliminate human error and ensure 100% compliance across all high-risk roles.

1. THE DIGITAL CREDENTIAL WALLET (MEMBER EMPOWERMENT)

We shift the burden of data entry from the Band Secretary to the individual member.

- Verified Profiles: Members maintain their own DBS details and training certificates in a secure "Digital Vault."
- The Update Service Logic: Built-in support for the DBS Update Service ensures that "expiry dates" become a thing of the past for proactive members, reducing administrative friction by up to 70%.

2. DUAL-KEY VERIFICATION (INSTITUTIONAL TRUST)

To ensure the highest standards of governance, Gighammer employs a "Two-Stage" approval process. No credential is "Active" until it has been double-verified:

- Level 1 (Local): Band Secretaries verify physical ID and original documentation in person.
- Level 2 (National): BBE Administrators provide final validation against official portals.
- Forensic Auditing: Every verification event is logged with a permanent timestamp and User ID, creating a legally-defensible record of due diligence.

THE "SAFE-TO-WORK" FRAMEWORK

3. ROLE-BASED COMPLIANCE ENFORCEMENT

Gighammer automates the decision-making process for "Safe-to-Work" status.

- The Safeguarding Toggle: Roles such as "Youth Tutor" or "Conductor" are flagged at the national level.
- Automated Blockers: If a member's DBS or training is missing or expired, the system instantly flags them as Red on the band dashboard.
- Real-Time Intervention: Organisations can see, at a national level, exactly how many "unverified" members are currently assigned to high-risk roles, allowing for immediate intervention.

THE FOUNDING PARTNER OFFER

Investment Structure:

FOUNDING PARTNER:	EARLY ADOPTER:	ENTERPRISE TIER:
£500/month 3 slots available	£850/month Launches June 2026	£1,500/month Standard 2027 rate

THE 12 MONTH PRICE LOCK

As a Founding Partner, your organization secures a **fixed rate of £6,000 per annum**. This rate is guaranteed for the duration of the 12-month pilot and includes:

- Unlimited group onboarding.
- Direct access to the Gighammer development roadmap.
- Waived implementation and setup fees (Value: £2,500).

ROADMAP AND IMPLEMENTATION

Phase 1:	April 2026 - Beta demo and feedback
Phase 2:	May 2026 - National Dashboard Launch and onboarding
Phase 3:	Q3 2026 - API Integration & advanced risk intelligence reporting

NEXT STEPS

We invite arts and sports organisations across the UK to adopt Gighammer as their enterprise digital governance solution. Our team is prepared to offer a seamless onboarding experience. To schedule a demo and discuss implementation, please contact **enquiries@gighammer.com**.
